

Pioneering HR Solutions

HR is undergoing a significant transformation in the face of evolving workplace dynamics and technological advancements.

"Organizations using AI in HR report a 27% improvement in hiring outcomes."

AI in HR: Transforming the Candidate Experience

A senior living organization with 150 locations was facing challenges in its recruitment process, receiving 25k applications per month and taking a long time to screen and hire candidates. Together with ReadyNine and a leading AI provider, the CPO introduced an AI-powered smart agent, to automate the initial screening process and filter candidates before they reach the second or third stage. This aims to streamline the recruitment process without negatively impacting the candidate experience.

- **Challenge** - High volume of applications (25k/month), that resulted in a slow screening process.
- **Solution** - Implemented an AI smart agent to automate initial screening, filter candidates, & improve efficiency.

Enhancing the Employee Experience

HR is leveraging technology to streamline processes, enhance experiences, and enable data-driven decision-making.

- 01 Talent Acquisition & Retention** - AI automates candidate sourcing, screening, and engagement, reducing biases.
- 02 Remote & Hybrid Work** - Tools like video conferencing, & messaging, enable hybrid teams to collaborate effectively.
- 03 Employee Engagement** - Pulse surveys, recognition programs, & feedback tools, help track & improve employee satisfaction.
